

Charter Flights and more

HeliJet Charter GmbH, with its headquarters in Langenfeld/Rheinland, is an officially approved, internationally active airline company with authorisation for instrument flight operations. 40% of flights are abroad. HeliJet currently operates three Sikorsky S-76 helicopters and a Learjet 60 aeroplane in commercial air transport. In the helicopters sector, the company safely serves the Federal Institute for Geosciences and Natural Resources (BGR) for scientific flight operations with its Sikorsky S-76 machines. The Federal Institute for Geosciences and Natural Resources is the central geo-scientific counselling institution of the Federal Government. Since 2012, HeliJet has provided one of its helicopters for supplying off-shore wind farms in the North Sea. Another core business is sky advertising using giant aeroplane banners. HeliJet Charter GmbH holds the world record for 2011 with a banner size of 5,000 m² and the world record for 2012 with a 5,107 m² banner.

HeliJet is the only company to offer unrestricted travel by helicopter in Germany. In addition, the airline company provides consulting services with regard to helicopter purchases and setting up helicopter landing pads.

In the aeroplanes sector, HeliJet has operated a Learjet 60 since 2013. The modern jet is employed worldwide. In terms of speed and reliability, it fulfils the highest requirements and complies with the strictest noise pollution regulations.

Each pilot has considerable flying experience and possesses the authorization for instrument flight operations. All captains have more than 2,000 hours of flying experience (some of them more than 10,000 hours). In addition, HeliJet has its own training and testing personnel for the training of pilots.

All aircraft are maintained exclusively by renowned German companies in accordance with the highest standards.
